

ELECTION OF INVENTION:

The Patent Examiner has required the selection of one of the following inventions for further prosecution:

Group I Claims 1-7, drawn to a wind energy power
generating system with an asynchronous generator
and a super-synchronous converter; and

Group II Claims 8-16, drawn to a method for regulating the
power output of a generator where slip power is
fed into power network.

ELECTION:

Applicants respectfully elect, with traverse, the invention of Group I, claims 1-7, drawn to a wind energy power generation system, for further prosecution.
